## Mines and Mining Stocks

## HAS SIOUX CON.

All the Latest Gossip Developed by Sensational Activity of Company's Stock.

Has ore been encountered in the Sioux Consolidated company's property at Tintic? That is the question which is being asked oftener than any other in mining circles at the present time and, notwithstanding the denials of the management that a strike has been made, the stock market leads to no other conclusion than that conditions underground are far bet-ter, to say the least, than is indicated by the report of Superintendent Holdaway.

The mine was closed down Thursday for the ostensible reason that there was something wrong with the compressor. Tintic engineers have since offered to wager that, if given the chance, they could place the compressor in commission in twenty minutes. Other reports from camp during the morning were to the effect that ore had been encountered and that the mine was closed in order to permit interested parties to pick ustock; that waste had been broken to cover up the ore and that, even though an inspection were made today, the ore could not be seen until some work had been done in the way of cleaning up.

These things are mentioned simply to show the character of gossip that is being peddled around concerning the property, the shares in which have doubled in value within two days, and to show how little the management seems to care whether the public is or is not misled re-

garding true conditions.
"If it is true that a strike has really been made, and if it is true that the mine has been closed down when it might just as well have been running and developing the newly encountered ore," said a member of the stock exchange yesterday, "whoever is responsible for it ought to be arrested. If no one else takes the initiative, I am in favor of this exchange paying for the services of a competent and disinterested engineer, who can go properly the services of a competent and disinterested engineer. paying for the services of a competent and disinterested engineer, who can go and make an examination of that mine and report his findings. I would be in favor of making a demand that he be admitted to the mine for the purpose stated and that if he found evidences tending to show that ore had been found and covered up, that he demand the removal of the debris, and that he stay at the property until he was convinced that the property until he was convinced that he had seen all there was to see. The public is deeply concerned in this business and it has a right to know whether it is being bamboozled or not and, as a repre sentative of the public's interests, I think this exchange should take action. If ev-

#### COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald:

Boston, May 29.—The unexpected dividend on North Butte gave the coppers a good lift this morning. The whole market was relatively strong and closed at the best prices of the day. People are getting used to the present level and we expect that the advance will be resumed as soon as the presidential conventions have been held.

## Six-Cylinder Evolution

Single Cylinder, Two Cylinder and Four Cylinder engines will be used indefinitely to meet their respective demands. Stevens-Duryea owners declare, after driving two and four cylinder cars and being familiar with certain four cylinder types higher in price even than the Stevens-Duryea Model "U," that they have invariably returned to the Six-Cylinder with added enthusiasm. The Flexibility, Smoothness and Surprises of the Six-Cylinder Engines have surely brought the eninder Engines have surely brought the en-thusiastic and exacting automobilist more than ever to the realization of his dream.

The Light Six .... \$3,500 The Big Six .... \$6,000 Arrange for a demonstration-

erything is straight and if the truth has been told about actual conditions in the mine, the management ought not to object to the exchange's application for an examination; if the reverse is true, the quicker that fact is known the better it will be for this exchange and the public." During the day H. S. Joseph asked Superintendent A. N. Holdaway for permission to send a man of his to the property ion to send a man of his to the property rom Bingham to size up conditions agreeing that any one the superintendent might name could accompany him. Mr. Joseph says that Holdaway's reply was that the Sioux Con. shaft was not a public thoroughfare and the man could not be admitted.

It was also reported during the afternoon that the Loose-Smoot interests in
the company, which are the controlling
factors, had decided that the management
of the property should be taken from
Holdaway and that Patrick Donnelly, superintendent of the Grand Control should perintendent of the Grand Central, should be placed in charge. It was declared that considerable dissatisfaction had de-

that considerable dissatisfaction had developed as a result of the "talkfest" that Holdaway has been indulging in, and the statement was made that he had probably been advised that his resignation would be favorably acted upon. Toward the close of the trading on change professional traders began to cut loose with the stock, the idea being that two days without a market was too long to hold such a hair-raising performer. It is expected that work will be resumed at to hold such a hair-raising performer. It is expected that work will be resumed at the property Monday and the hope is that somebody in authority will then make a statement that can be relied upon.

#### RECEIVER OF LINCOLN CO. SETTLING WITH MINERS

Every effort is being made by the owners of the defunct Lincoln mine, located near Pearl, to place it on its feet again and have it in operation some time during this summer, says a Boise paper.

From information received today it was learned that the men who have wages coming for work which they did for the mining company are filing liens on the property and these are being taken care of as fast as they come in by Receiver J. W. Edmunds, who is at present at the mine.

property and these are being taken care of as fast as they come in by Receiver J. W. Edmunds, who is at present at the mine.

The Lincoln mine was forced to go into the hands of a receiver about a month ago, at which time the court appointed two official receivers, J. W. Edmunds and Thomas Weir of Salt Lake. The former has been at the property for some time taking care of the creditors' and owners' interest, but the latter so far has not visited the mine. When it was announced that the property would have to close visited the mine. When it was announced that the property would have to close down, the sixty hands employed were thrown out of work. The company backing the property was incorporated in New Jersey and is composed of financiers of New York. When legal proceedings were taken against the company to satisfy the creditors, many of the hands were left without their pay, and for this reason they have been filing liens as rapidly as they have been filing liens as rapidly as

ossible.

It is now said that the mine may open up after the middle of June. The date set for the hearing of the defunct company is June 21, the auditors having until that time to file all claims. The Lincoln mine is one of the richest silver and gold quartz properties in the state of Eliabeta and it is said that if property of Idaho and it is said that if properly handled will produce in paying quantities. The present indebtedness hanging over

#### DOINGS OF UNLISTED STOCKS ON EXCHANGE

During the open board sessions on change yesterday sales were recorded and quotations made as follows: East Crown Point sold at 3 cents. Mason Valley at \$1.10 and \$1.12½. Ohio Copper at \$2.40 and \$2.35, Thompson at 26 cents and Western Nevada Copper at 30 cents and Western Nevada Copper at 30 cents and 32½ cents. Twenty cents was bid for Bovard, 25 cents for Consolidated Jefferson, with Size cents asked.

Mr. Craig reports that the new mill of the Mazuma Hills company is just abour ready to go into commission and that when he left for hom the size of teams were hauling ore from the s

## GALENA KING DISLIKES DEAL

Company Goes to Court to Upset Alleged Scheme of the Honerine Bunch.

The Galena King Mining company yesterday brought suit in the district court against the Honerine Mining & Milling company and the Honerine Tunnel & Milling company, in which the court is asked to have a judgment for \$343,339.29 entered against the Honerine Tunnel company and in favor of the other Honerine Mining company vacated and declared void. It is also asked that an accounting be ordered of transactions between the two companies, and it is also asked that the Honerine Tunnel company be required to keep certain agreements with the plaintiff respecting the right of way through the property in the Rush Valley. terday brought suit in the district court ing company, in which the court is asked to have a judgment for \$343,339.29 entered against the Honerine Tunnel company and in favor of the other Honerine Mining company vacated and declared void. It is also asked that an accounting be ordered of transactions between the two companies, and it is also asked that the Honerine Tunnel company be required to keep certain agreements with the plaintiff respecting the right of way through the property in the Rush Valley mining district in Tooele county.

The complaint states that these rights of the plaintiff have been damaged by the fact that the Honerine Mining company has transferred to itself thousands of dollars' worth of credits of the tunnel company and then obtained the judgment mentioned against it. It is also alleged that overcharges for salaries and so forth were made and the stock of both companies was manipulated to the detriment of the plaintiff.

of the plaintiff. Attempts have been made to arbitrate the differences, which are of a most complicated nature, but the affairs of the defendant the defendant concerns are controlled, it is alleged, by George A. Baird, of Chicago, who will not allow a settlement to

be made.

After locating and starting the work on a new operating shaft at the Seven Troughs Eclipse property and after making all arrangements for the new gaso-line hoist that has been delivered at camp, Manager W. J. Craig returned from the Seven Troughs district Thursday evening to attend the funeral of the late L. U. Colbath, which occurred yesterday after-

noon.

Mr. Craig stated during the day that a road over which to haul the hoisting plan on to the company's ground was practic ally completed when he left the mine and that the plant would be in position and the building up by the time the boys were ready to discard the windlass in sinking which it is proposed to do at the fifty of sixty-foot mark. The shaft was located with the idea of encountering the ledge a respectable depth in sinking and Manage Craig says that the highly mineralized character of the ground can be imagined when it is known that, in sinking the first twelve eet two stringers of rich ore were cut. These, of course, will pass out of cut, These, of course, will pass out the shaft on their dip before much dep

#### LATEST NEWS FROM GOLD CIRCLE DISTRIC

Willard F. Snyder, president of the Go Willard F. Snyder, president of the Goi Circle Crown company, returned from several days' trip to Gold Circl Thursday evening highly pleased wit conditions at the company's property an with the camp in general. He report that the company's shaft has been com-pleted to the 100-foot level and that th tunnel designed to tap it at that dept would connect during the next three of four days.

four days.

"As soon as this connection is made,"
said Mr. Snyder, "we shall commence
taking out ore for shipment and I feel
safe in saying that a good carload will
be ready for market by the 20th of June
and that the ore will average better than
\$100 per ton. I have not the least doubt
in the world. A tunnel that is being driven
by one of the leasers on the property by one of the leasers on the property can be extended from the block of leased ground into company operated ground and extended under the present company shaft at an additional depth of 219 feet. In the meantime we shall continue the present shaft down from the tunnel level and have it ready to connect up with the lower tunnel when that shall have been sent out at the additional depth men-

dioned."
Mr. Snyder says at least three of the

without delay.

"This is a matter that I am going to take up with the chief interests in our company during the early part of the coming week and I hope then to be able to announce that a mill will be installed that is capable of taking care of the camp's ores in such stape that all hands can get returns for their labor."

'No Strike" Story of Sioux Con.

Management Is "Coppered." The protestations of the Sioux Consolidated management that no strike had The protestations of the Sioux Consolidated management that no strike had been made in the property did not go with the public or the professional mining market traders and the stock did another soaring stunt that was heartbreaking in its effect on the "shorts." Starting at 40c the advance was not checked until it had climbed to 51c. Then it slid back to 46c and again advanced to 50c. In the afternoon the professionals got back a little of their lost nerve and, while the stock was gradually falling from 49c to 42½c at the finish considerable shorting was done. The chief cause of the decline, however, rested in the fact that there was a double holiday ahead and the talent did not care to carry the stock over. Nearly \$5,000 shares were represented in the trading in this one stock during the day, less than 50,000 shares of all other stocks being represented in the business of the day.

During the two regular and open board calls a total of 123,778 shares of stock, with a selling value of \$66,149.38, changed hands. During the month 2,770,379 shares of stock, with a selling value of \$1,104,692.27 was the record. Following is the list of final quotations and record of sales made during record. Following is the list of final quo-tations and record of sales made during Forenoon. | Afternoon.

Mr. Snyder says at least three of the leasers on company ground are getting ore that will pay to ship, while large quantities of fine milling ore are being developed in all directions. At least 150, men are now working in the principal part of the district and the showing being made in Gold Crown territory, as well as in other properties, makes it imperative that a mill be erected in the camp without delay.
